I find that Instant Traffic and Weather on satellite radio keeps me informed and safe. If I suddenly need to learn what's happening up ahead, I turn to satellite radio and the information is there at that moment. On news radio, I may have to wait up to ten minutes for traffic information and, if I'm talking or daydreaming, oops I've just missed it. So I have to wait another ten minutes. To me, when I'm driving, satellite radio is safety radio. Please ensure this great service continues.
